

**Prefabricated EFFLUENT TREATMENT PLANT operating on MBBR technology**

- Compact plant with small foot print
- Prefabricated skid mounted unit, requiring low civil cost
- Quick installation and ready to use plant
- Automated operation
- Low operation cost of power and chemicals

## Damodar ETP - designed for Rice Mills

- The plant uses biomedica made of synthetic material with a unique pattern to provide high surface area within a given volume. The biomedica acts as a carrier of micro organisms enabling high population to develop in compact area.
- The operation of the system is simple & reliable, with ability to handle fluctuating loads.
- Treated effluent confirms to PCB norms.
- Plant is coated with a high built epoxy liner, suitable for open to sky installation.
- Plant is designed keeping in mind unique requirements of the rice industry.

**All our machines carry DAMODAR guarantee of service & availability of spares.**

A range of models for all conditions

Using technology to serve industry, since 30 years
